CCPE - MELOCHE MONNEX SCHOLARSHIPS

Mathieu Courchesne, ing., is a member of the Ordre des ingénieurs du Québec who earned a degree in chemical engineering from the Université du Québec à Trois-Rivières. Mathieu is pursuing a degree of Doctor of Medicine (M.D.) at the Université de Sherbrooke.

According to Mathieu, engineering and medicine have much in common. In engineering, we look for what is not functioning at an optimal level, find the cause, and determine the solution.

Medicine is similar in its approach, but applies to the human body.

Despite his interest in R&D, working in a clinic and the emergency wards are Mathieu's passion.

In the near future, Mathieu hopes to intern at a hospital, but is also considering the possibility of pursuing a career in magnetic resonance imaging or bionic prosthesis.
