

*Jeffrey Hicks, P.Eng.  
Association of Professional Engineers  
and Geoscientists of New Brunswick  
Master's of Business Administration  
University of Western Ontario*

## *CCPE - MELOCHE MONNEX SCHOLARSHIPS*

*The CCPE-Meloche Monnex scholarship recipient, Jeffrey Hicks, P.Eng. has already earned a bachelor and master's degree in chemical engineering from the University of New Brunswick. Now he is pursuing a master's of business administration, or MBA, from the University of Western Ontario.*

*Jeffrey spent several years in the industry, as an engineer, before deciding to do an MBA. Soon after landing his first job as a junior engineer, Jeffrey was quickly thrown into a more senior level position.*

*Jeffrey feels that this opportunity allowed him to be "groomed" and mentored by several key, senior-level individuals.*

*Although doing an MBA was something he knew he always wanted to do, Jeffrey believes that his engineering education and work experience have helped him tremendously with his business degree, and in many ways augment his engineering skill set.*

*Through engineering, Jeffrey, a member of the Association of Professional Engineers and Geoscientists of New Brunswick, has learned fundamental technical knowledge. He hopes that by completing his MBA, he will be able to build on his management and people skills and become a highly effective supervisor and negotiator, working as an engineer in a managerial role with a technical or production group.*

*Jeffrey believes that in this role, he can most effectively share the knowledge he's learned with others and thereby contribute to society.*

*Looking ahead, Jeffrey would like to return to his home province of New Brunswick once his studies are completed. But in the meantime, Jeffrey is on a four-month exchange program in Australia, as part of his MBA program.*
