TD Insurance Meloche Monnex Scholarship

Simon J. Rose, P.Eng., believes the potential global impact of the engineering profession is enormous. His goal is to fulfill his career as an engineer while providing healthcare to Canadians. Through his combined education in mechanical engineering and medical training, he aims to advance the delivery of remotely controlled surgical procedures.

Currently enrolled in the Doctor of Medicine program at the University of British Columbia, Simon is working towards becoming a surgeon. Simon's thorough understanding of the surgical process and the principles of engineering will allow him to efficiently practice surgery in addition to providing a high level of interdisciplinary collaboration.
